

Business AI Model Final Year Project Package

AI Based Online Selling Automation System

Student Name: _____

Guide: _____

Institute: _____

Academic Year: _____

Certificate

This is to certify that the project Business AI Model is successfully completed.

Declaration

I hereby declare that this project is my original work.

Acknowledgement

I thank my guide, institute and all supporters.

Abstract

This project focuses on AI based automation for online selling business.

Synopsis

Project synopsis includes objective, methodology and expected outcomes.

Introduction

Business AI Model automates product selection, pricing, listing and order management.

Problem Statement

Manual systems cause inefficiency, loss and slow growth.

Objectives

Prediction, automation, smart pricing, notification system.

System Overview

System divided into AI module and Seller module.

AI Module

Prediction engine, pricing engine, auto listing, order confirmation, notification system.

Seller Module

Notification check, procurement, packing, dispatch.

Workflow

AI Flow: Data → Prediction → Pricing → Listing → Order → Notification

Seller Flow: Notification → Packing → Dispatch

Advantages

Automation, scalability, profit optimization, time saving.

Future Scope

Inventory AI, supplier AI, chatbot, auto shipping, multi-platform integration.

Conclusion

Business AI Model is a complete AI-based e-commerce automation solution.
